

HP90™ Copper Tube for 90 Bar Applications

Engineered to safely handle any stand-still situations in subcritical CO2 refrigeration systems and to complement the XHP offering on the transcritical side.

- Available in sizes 3/8" to 2-5/8"
- Pure C12200 Copper with extra-heavy wall thickness
- Engineered for subcritical CO2 systems, even in a power outage
- UL Recognized to 1305 PSI (90 BAR)
- Intended to replace demand for ACR Types L & K (not XHP)
- Made to order (8 week lead times)
- **Must be used with Streamline® XHP Fittings**

Intended for use with Streamline® XHP Copper-Iron Fittings and Valves
